Classes Autograder

This repository contains three Python classes for testing:

1. **BankAccount** - A simple bank account with deposit and withdrawal functionality
2. **PythagoreanTheorem** - A class to calculate the hypotenuse of right triangles
3. **Student** - A simple student class to store name and grade information

Files

- `bankaccount.py` - BankAccount class implementation
- `pythagoreantheorem.py` - PythagoreanTheorem class implementation
- `student.py` - Student class implementation
- `tests/` - Directory containing test files for each class
